

ONE ToGo

The World is Mobile!

oneToGo has arrived on your customers mobile! Taking full advantage of the limitless possibilities provided by the Internet, our latest offering will allow your customers to place orders from any Android or Apple Smart Phone even if they do not use a browser. This same technology can be applied to Kiosks and In store ordering stations that eliminate the need for Cash Registers.

Connect To Your Customer!

oneToGo is an App, so it is active on your customers mobile phone at all times and can have built in reminders, offers that can be made to the customer at the moment when they are making a buying decision (like Friday Night at Dinner time). You can also build in any number of interactive features to allow you to pamper your customers.

Versions for Android & Apple iOS!

Your Apps are made available in either the Apple App Store or the Android Play Store and can be downloaded direct by your customers.

The world has gone Mobile, now you can too! Mobilize your sales and drive your customer count and frequency. Be there when your customer is ready **To Go!**
